### Online license temporary tag instructions

- This sample tag, or a piece of paper including your name, address and date the deer was taken, must be attached to the leg of the deer immediately after taking the deer.
- Cut the sample along the dotted line
- Write your deer hunting license number on the tag.
- Upon killing a deer, immediately mark the tag with the month and the date of the kill, and the sex of the deer.
- You are not required to have the tag attached to the deer while dragging it from the field, but you must tag it before you load it in a vehicle or leave it unattended.
- Deer must be checked at a deer check station within 48 hours of taking.
